

We don't just talk about quality ...

TÜVRheinland[®]
CERT
ISO 9001

Dear Mr. Aguirre,

As a supplier for many innovative industry sectors, our daily bread and butter has for many years been the delivery of top-notch services on a daily basis. That is why we have aligned our internal processes to ISO 9001 requirements at a very early stage, and thus, acquiring the actual official certification was the next logical step for us. The TÜV Rheinland certification we have now received is further proof to the superior quality of services provided by WIWA: first-rate customer-orientation, process-oriented organisational approaches, a clear strategy and well-defined objectives - and of course our constant striving towards more improvement and innovation.

Our consistent success in terms of what we do and how we do it, is proven time and again in the satisfaction of our clients, some of which have been working with our devices for several decades. A joinery in Würzburg, for example, used a WIWA 2000 1K system for over 38 years. Two generations of joiners have varnished precious surfaces there with dexterity and various materials. So you see: we don't just talk about quality - we build it.

Best wishes from Lahnau,
